Published monthly, *The Joint Commission Journal on Quality and Patient Safety* is a peer-reviewed publication dedicated to providing health professionals with the information they need to promote the quality and safety of health care. The *Journal* invites original manuscripts on the development, adaptation, and/or implementation of innovative thinking, strategies, and practices in improving quality and safety in health care. Case studies, program or project reports, reports of new methodologies or new applications of methodologies, research studies on the effectiveness of improvement interventions, and commentaries on issues and practices are all considered. Please find Information for Authors at <https://www.elsevier.com/journals/the-joint-commission-journal-on-quality-and-patient-safety/1553-7250/guide-for-authors>.

The overall mission of The Joint Commission is: To continuously improve health care for the public, in collaboration with other stakeholders, by evaluating health care organizations and inspiring them to excel in providing safe and effective care of the highest quality and value. The *Journal* supports this mission by publishing rigorous evaluations of practical interventions to improve quality and patient safety that inspire its readers to excel and encourages them to implement strategies published in the *Journal*, create their own quality and safety improvement initiatives, and publish their experiences in the *Journal*. The mission of the *Journal* is: To improve health care quality, safety, and value by providing professionals and researchers a learning community to share innovative thinking, strategies, and practices.

No statement in The Joint Commission Journal on Quality and Patient Safety should be construed as an official position of The Joint Commission or Joint Commission Resources unless

otherwise stated. In particular, there has been no official review with regard to matters of standards compliance.
